- Easy cleaning thanks to removable brewing group
- Easy cleaning thanks to dishwasher-safe drip tray
- Easy cleaning thanks to dishwasher-safe parts

PHILIPS

Saeco is a trademark of the Philips Group

Saeco

Highlights

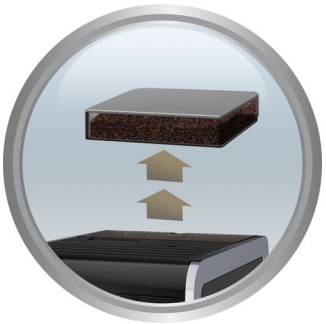
100% ceramic grinders

This espresso machine is equipped 100% ceramic grinders. Saeco uses ceramic grinders because of their consistent grind without overheating the coffee bean for an impeccable espresso. Ceramic also ensures long-lasting performance and a totally silent operation.

Quick heat boiler

The Saeco quick heat boiler technology ensures your machine is always ready. Now you won't have to wait between brewing each espresso, but can prepare coffee after coffee.

Coffee bean switcher



With the Saeco Moltio espresso machines you can now change beans with only one click thanks to the patented exchangeable bean container. Enjoy the convenience of quickly changing the beans blend and find the perfect fit for every taste preference and moment of the day.

Automatic milk frother

Preparing a tasty cappuccino is easy with this Saeco espresso machine thanks to the new, patented automatic milk frother with its cyclonic chamber. The milk frother, which baristas also call “cappuccinatore”, will draw milk directly from a milk carton or jug and froth it automatically, dispensing it directly into your cup. And thanks to the exclusive cyclonic chamber, a constant flow of milk without any splashing is guaranteed.

Saves your coffee settings

You will always get a perfect cup of espresso brewed just for you, according to your personal preference, thanks to our innovative memo function to adjust the coffee length, strength and temperature. Enjoy a superb coffee drink in your favorite cup with just the press of a button.

Dishwasher-safe parts

For your convenience, you can put the Saeco’s drip tray and milk frother or milk carafe in the dishwasher. This will save time and ensure a hygienic cleaning.

Dishwasher-safe drip tray

For your convenience, you can wash the drip tray of your Saeco in the dishwasher. This will save time and ensure a hygienic cleaning.

5 step adjustable grinders

Different coffee blends require different levels of granularity for the full flavor to unfold. The grind granularity of this espresso machine can be adjusted in 5 settings, from the finest grind, for a full bodied espresso, to the coarsest, for a lighter café crème.
